

Overview

Using Royal Mail PAF® data, AFD Postcode® with Robot® technology offers every computer user fast, affordable and easy access to accurate address entry – from just the postcode. Original Robot technology detects a postcode typed into virtually any application and automatically delivers the accurate address. With nothing to click, press or program, AFD Postcode provides a unique level of productivity improvement. Robot is one of many additional features added to Postcode.

What is Postcode used for?

AFD Postcode is at work today in thousands of organisations - anywhere that fast, accurate address entry is needed including call centres, telesales and contact management.

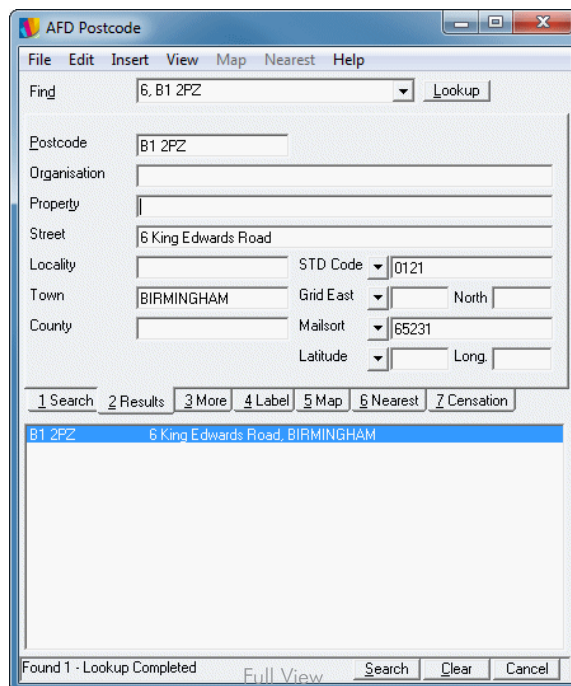

Simply type a Postcode into virtually any Windows contact manager, word processor, spreadsheet or database..... and the address will automatically appear. There is nothing to click, press or program and no windows to swap or hotkeys to press.

Postcode supports 'reverse searching' to find a list of postcodes from a street and post town or STD Code. If you need full property level data and to search using any address fragment, choose Postcode Plus or Names & Numbers.

Business Benefits

- Save 80% of keystrokes entering addresses**
- Save hours of wasted time**
- Eliminate spelling mistakes**
- Enter first-rate, reliable addresses**
- Create a professional image on all correspondence**
- The Robot eliminates annoying pop-up address entry windows - saving time and effort**

“Accurate Address Entry, Quicker Than Ever!”
